

NORTHSTAR FIELD HANDBOOK ? TRAVEL REQUESTS

Version 1.3, January 2025

Standard domestic travel requests must be submitted through TrailDesk at least ten calendar days before departure. The employee's team lead is the normal approver. A budget code must be included before review begins.

This handbook applies only to Northstar field staff. It does not describe contractor travel.

BOOKING AND COST LIMITS

After approval, travelers book rail and lodging through the company portal. A hotel may cost up to 180 dollars per night before tax. The limit is 240 dollars in Harbor City during the annual November summit.

Receipts are required for any individual expense above 25 dollars. Meals use the daily allowance and do not require itemized receipts.

CHANGES AND CANCELLATIONS

A traveler who changes an approved itinerary must update TrailDesk. Changes adding more than 100 dollars require a new team-lead approval. A cancellation caused by severe weather does not require new approval, but the traveler must attach the carrier notice within three business days.

Unused rail tickets must be reported to Finance.

URGENT SAFETY EXCEPTION

When an official evacuation order or documented medical emergency makes the normal ten-day deadline impossible, the traveler may submit after departure. The Regional Safety Director?not the team lead?must approve the request. Evidence of the emergency and the request must be filed within 48 hours after the traveler reaches safety.

A delayed meeting, a low fare, or ordinary bad weather is not an urgent safety exception.

REIMBURSEMENT AND CONTACTS

Approved expenses are reimbursed in the next payroll cycle when the report is complete. Reports filed more than 30 calendar days after return require a written explanation. Questions about budget codes go to Finance Operations; questions about evacuation evidence go to the Regional Safety Office.

The reimbursement deadline does not replace the separate 48-hour safety-exception filing rule.
